

WARDROBE BY
MAXMARA

THE QUEEN OF *Anti-Aging Indonesia*

Despite her busy schedule and active involvement in various organizations, her beauty and health are still clearly maintained. It seems almost natural that the charismatic, beautiful, energetic and youthful doctor specializes in anti-aging graduated cum laude from WOSAAM Paris. Her perfect health is palpable from her slender frame.

Dr. Deby is the owner of the Perfect Beauty Aesthetic and Anti-Aging Centers as well as the Chief Executive Officer and majority shareholder of Eradunia Group. She is the President Director of PT. Eradunia Interperdana Management Consultants and of Perfect Model & Image Academy.

Her first publication 'The Perfect Beauty Anti-Aging Book' is scheduled to be launched in early June, 2012. The book describes the secrets she has learned to stay young, healthy and sexy. Deby, the fashionable doctor, a lover of fine jewellery who has graduated from the Institute of Gemology, is a diamonds expert and is in the process of preparing her exclusive solid gold and diamond evening clutch under the brand name 'Vinski'. She is very excited about this new project and believes that a special lady merits her gold creation encrusted with precious stones because a clutch can also be a fine piece of jewellery, to be treasured for future generations.

Most of her time is dedicated to tailoring special programmes for her patients because anti-aging treatments are designed not only to prevent disease but to reverse aging and rejuvenate the cells in the organs of the body. Anti-aging treatments are not confined to the skin on the surface of the body, but extend to the cells of the heart, brain and bone to enhance inner beauty, stay young and healthy and with an improved attitude to life.

"Today I would like to inform your readers about Perfect Beauty" Dr. Deby says.

"Perfect Beauty provides a full range of world-class anti-aging treatments including Stem Cell Transplantation for Male and Female Rejuvenation, Male Vitality, Natural Bioidentical Hormone Therapy as well as beauty treatments such as Lipolaser, nanotechnology for slimming and body reshaping. Our in-house Plastic Surgery Department provides a full range of treatments. We basically offer state-of-the-art services according to the highest international standards in Aesthetic and Anti-Aging medicine, applying the latest available products and technology. All are either FDA (USA), LE (Europe), or TGA (Australia) approved."

"At Perfect Beauty, our objective is to improve both your health and appearance in a balanced way." She explains. This balance results in feeling better, gaining confidence, and hence experiencing a marked improvement in quality of life. Perfect Beauty also treats

patients with Down's syndrome and Alzheimers. Our preventive and post-stroke treatment has proven to be highly effective. Their Haute Couture clinic carries out genetic typing tests so you can rely on a single genetic passport, invaluable for predicting your genetic destiny and guiding in the formulation of our treatment programmes. Our CAATS (Computer Anti-Aging Touch Screen) system provides intelligent medical records, evaluating patient symptoms in a comprehensive, non-invasive manner and indicating most probable diagnoses. Aside from our Centers, select clinics in USA, Italy, UK and Belgium already use CAATS."

"In summary, Perfect Beauty Aesthetics and Anti-Aging Centers mobilize all aspects of anti-aging and aesthetic medicine to attain the patient's goals. They specialize in minimally-invasive proven procedures using lasers and needles. Patients are treated holistically; that is, not only focusing on appearance but also on physical and mental aspects."

"Perfect Beauty Centers are staffed by Western-trained doctors who personally supervise all aspects of the anti-aging and aesthetic treatments. An initial consultation permits us to design an appropriate course of treatment with a flexible schedule and agreed fees. We recently received the award for 'Best Anti-Aging Clinic of the Year' together with 'Best Service Excellence Clinic of the Year 2012' as a result of our focus on excellence and the tender care and love we show to all our patients"

Married to Ivek Vinski and blessed with a 19 year old daughter, Natasha Cinta, who also studied medicine, Dr. Deby is a pioneer of anti-aging medicine in Indonesia and has accumulated 17 years of experience in aesthetic medicine. Being the first Indonesian graduate from both AAMS and the WOSAAM Board Anti-Aging Certification cum laude, she is commonly referred to as 'Queen of Anti-Aging' in Indonesia. She was presented with the Kartini Award by Madame Ari Bambang Yuchoyono for her pioneering work in anti-aging medicine.

She is also the President of the Indonesian Institute of Aesthetic and Anti-Aging Medicine (IIAAM), based in Jakarta. She is currently taking a Masters in Preventive Anti-Aging medicine at Dresden International University and is a Scientific Advisor for WOSIAM and Vice President (Asia) of WOSAAM (World Society of Anti-Aging Medicine).

So what does the future hold for Dr. Deby who seems to have it all? "I thank God and I feel fortunate to be able to work in a field that I absolutely love and am passionate about. I intend to grow my business by delivering the best results to my patients. In the end I want each and every patient to improve his/her quality of life and just to feel happier. Such results are already an incomparable reward for me!"
